EarthShine's Arduino Starters Kit Manual

Hi! I bet you're looking for the *very excellent* "Arduino Starter Kit Manual" by EarthShine Electronics. We had an old copy hosted locally on our webserver, but it was falling *way* out of date with the official release, so we replaced it with this document.

Sorry, our webserver doesn't allow us to replace an actual file with a URL (yet), so we made this document.

Here's the link to the latest copy of the document over at EarthShine. Support their efforts by supporting them too!

While you're at it, take a boo at the free documentation for the Oomlout Arduino Experimenter's Guide.

It is *totally* free under a Creative-Commons Share-Alike Attribution license, you can use it anyway you'd like (we even have the source files available!).
